Objective: *Seeking opportunity as a **Front End/Web Developer***

Education:

GEORGIA STATE UNIVERSITY - Atlanta, GA   *Class of 2016*
Bachelors of Science in **Computer Science** (B.S.)   **GPA: 3.72 // Dean's List**
Relevant Coursework:

- Data Structures
- SPARC Assembly Language
- Web Programming
- Database Systems
- Software Engineering
- Math Models for CS
- Unix/Linux & C Programming
- Design & Analysis: Algorithms
- Windowing Systems Programming
- Human-Computer Interaction

Experience/Projects:

Westat Inc. - <u>Software/Web Developer</u> - Atlanta, GA   **(July 2016 – Present)**

Westat Inc. - <u>Software/Web Developer Intern</u> - Atlanta, GA   **(June 2015 – June 2016)**

- Developed, designed, and implemented Web-based client projects/applications, utilizing the latest technologies & environments such as HTML5, CSS3, Javascript, C# & .NET with MVC & Web Forms to establish performance, lasting maintenance, and efficiency for our client's end users
- Solved solutions to bugs, applied new efficient frameworks such as Flexbox & produced additional features on existing applications & platforms to improve the application's longevity & overall quality
- Worked within a cross-functional team of 4-7 developers as well as with a Supervisor & Project Manager
- Adhered to client specifications & requirements in given time frames for proficient task management utilizing Redmine to optimize workflow & development

Corporate Reports Inc. (Blue Chip Communication) - <u>Web Developer Intern</u> - Buckhead, GA   (Jan 2015 – May 2015)

- Front-end markup, development & updates to existing and developing sites for big clients utilizing HTML5 & CSS3
- Aided in media changes & manipulation for client sites using Adobe Creative Suite
- Took part in detailed Quality Assurance for testing and reviewing client web-pages (Interactive & Design) across various browsers and devices for efficient responsiveness
- Worked closely with a small group of 3-5 designers & developers while under supervision of a Project Manager apart of the Interactive Team utilizing Basecamp for efficient task management

Boombee (Mobile App Startup) - <u>Software Engineer Intern</u> - Atlanta, GA   **(Sept 2012 – Dec 2012)**

- Collaborated in a group of 4 to 6 people
- Involved in app design and project management
- App performed as a social network of live-streaming video used on Web and Mobile platforms
- Assisted in application testing on a variety of mobile devices (iPhone, iPad, Android, Tablets)
- Learned about latest Web Technologies powering Boombee

Skills:

Programming: Java, C#, .NET, MVC, C, Razor, Web Forms, Unix Utilities
Web Development/Scripting: HTML, CSS, Bootstrap, Javascript, Jquery, Ajax
Databases: SQL, PostgreSQL, pgAdmin
Design: Adobe Photoshop, Adobe Illustrator, Adobe InDesign
Environments/Tools: Mac OS, Windows, Microsoft Visual Studio, Net Beans, Eclipse, Sublime Text, Atom
Source Control: Git, Gitbucket, TortoiseGit, SourceTree

Hobbies/Interests:

- Music
- 3D puzzles such as the Rubik's Cube and many other kinds.
- Exercising - Running
